The Nursing Community coalition includes 63 national nursing organizations that are the cross section of education, practice, research, and regulation within the profession. The Nursing Community is committed to improving the health and health care of our nation by collaborating to support the education and practice of Registered Nurses (RNs) and Advanced Practice Registered Nurses (APRNs). With over four million licensed RNs, APRNs, and current nursing students, the profession embodies the drive and passion to continually improve care for patients, families, communities, and populations across the continuum.
Nursing Workforce Development Programs
Administered by the U.S. Department of Health and Human Services, Health Resources and Services Administration

How the Programs Serve the Community

For over 50 years, the Nursing Workforce Development Programs (Title VIII of the Public Health Service Act [42 U.S.C. 296 et seq.]) have helped meet the nation's demand for nursing services. These programs address all aspects of nursing education, practice, recruitment, and retention—focusing on meeting the needs of rural and underserved communities.

Advanced Nursing Education (ANE) Grants, ANE Traineeships and Nurse Anesthetist Traineeships
Support those studying to become our nation's nurse practitioners, clinical nurse specialists, certified nurse-midwives, certified registered nurse anesthetists, nurse educators, administrators, public health nurses, and other nurses requiring a master's or doctoral degree.

Nursing Workforce Diversity Grants
Help recruit and retain students from minority and disadvantaged backgrounds to the nursing profession—increasing access to quality, culturally-sensitive patient care.

Nurse Education, Practice, Quality, and Retention Program
Help schools of nursing, academic health centers, nurse-managed health clinics, state and local governments, and healthcare facilities meet shifting demands in health care.

NURSE Corps Loan Repayment and Scholarship Programs
Help ensure nursing students and nurses enter into practice where healthcare facilities have a critical shortage of nurses, most often in health profession shortage areas and those that are medically underserved.

Nurse Faculty Loan Program
Help graduate students move through their program so they can serve as faculty members and educate the next generation of nurses.

Comprehensive Geriatric Education Grants
Help support the education of nurses who will provide direct care to America's aging population.

61,172 Total Students Supported in Academic Year 2015-2016¹

Federal Funding for Title VIII Programs by State: Fiscal Year 2016

National Institute of Nursing Research
As one of the 27 Institutes and Centers at the National Institutes of Health (NIH), the National Institute of Nursing Research (NINR) funds research that establishes the scientific basis for quality patient care.

Did You Know Nurse Scientists...
- Conduct genetic, genomic, and omics research
- Transfer big data to knowledge
- Lead team science
- Engage in precision health initiatives
